Use Cases

Use Case	System Login	
Objective	Allow users to login to the system	
Business Event	Allow a user to login so that they can complete the following use cases.	
Primary Actor (s)	Admin or Employee	
Secondary Actor (s)	None.	
Pre-condition	User must be registered as a user in the system.	
Post-condition	User is forwarded to the home page.	
Failure outcomes	User is shown an error message 'Username or Password is incorrect.	
Flow of Events	Actor	System
1	User in the login page	
2	User enters correct login credentials and clicks on the login button (login.php).	Connects to DB to verify credentials
3	User sees home page. (home.php)

User Name

Password

Use Case	View Employee	
Objective	View Employees in the system	
Business Event	View Employees in the system	
Primary Actor (s)	Administrator	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Employees” link in the home page	
Post-condition	User is forwarded to the Employee page.	
Failure outcomes	User is shown an error message ‘Error in viewing Employee page’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Employees page (employees.php).	Employees page is shown.
3	User sees the employees.php page.	

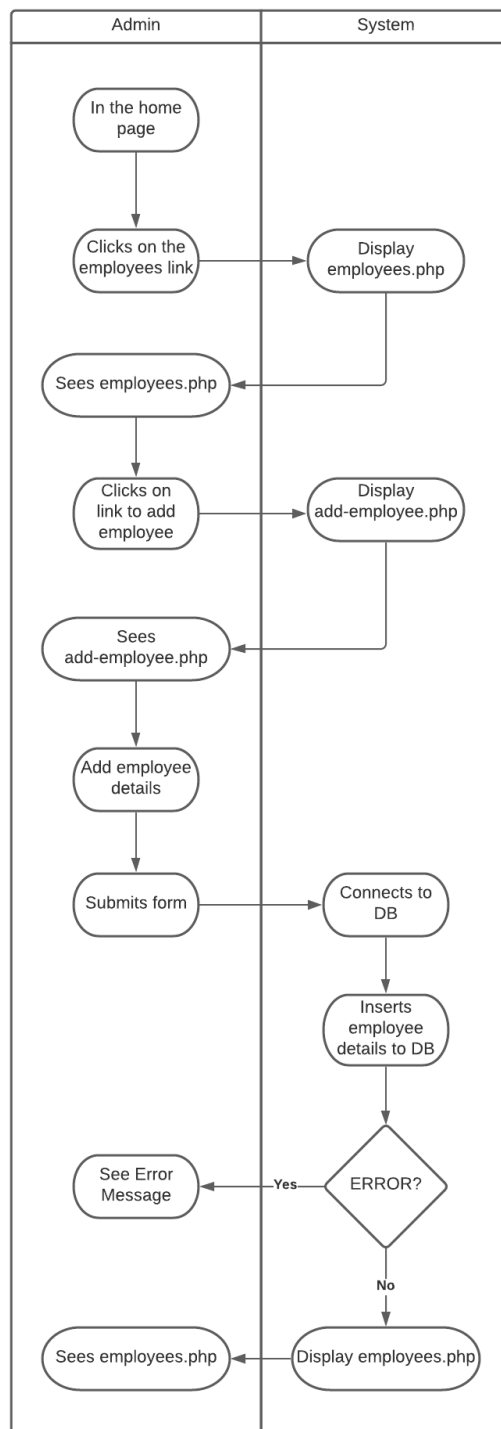

View Employee

Use Case	Add a new Employee	
Objective	Add a new Employee into the system	
Business Event	Add a new Employee into the system	
Primary Actor (s)	Administrator	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Employees” link in the home page User clicks on the “Add Employee” link in the employees page.	
Post-condition	User is forwarded to the Employees Page.	
Failure outcomes	User is shown an error message ‘Error in adding a new Employee’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Employees page (employees.php).	Employees page is shown.
2	User clicks on the add new Employee page (add-employee.php).	Add Employee page is shown.
3	User adds new Employee details.	
4	User submits the form.	Connect to the database. Insert employee details into the Employees table. Forward user to the employees.php page.
5	User sees the employees.php page.	

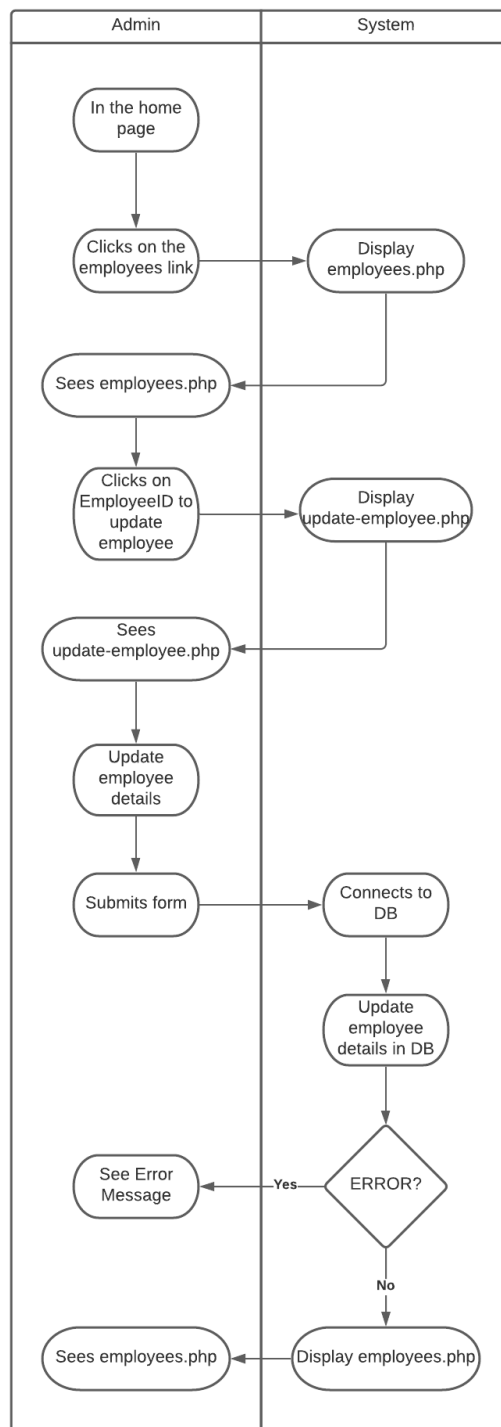

Add Employee

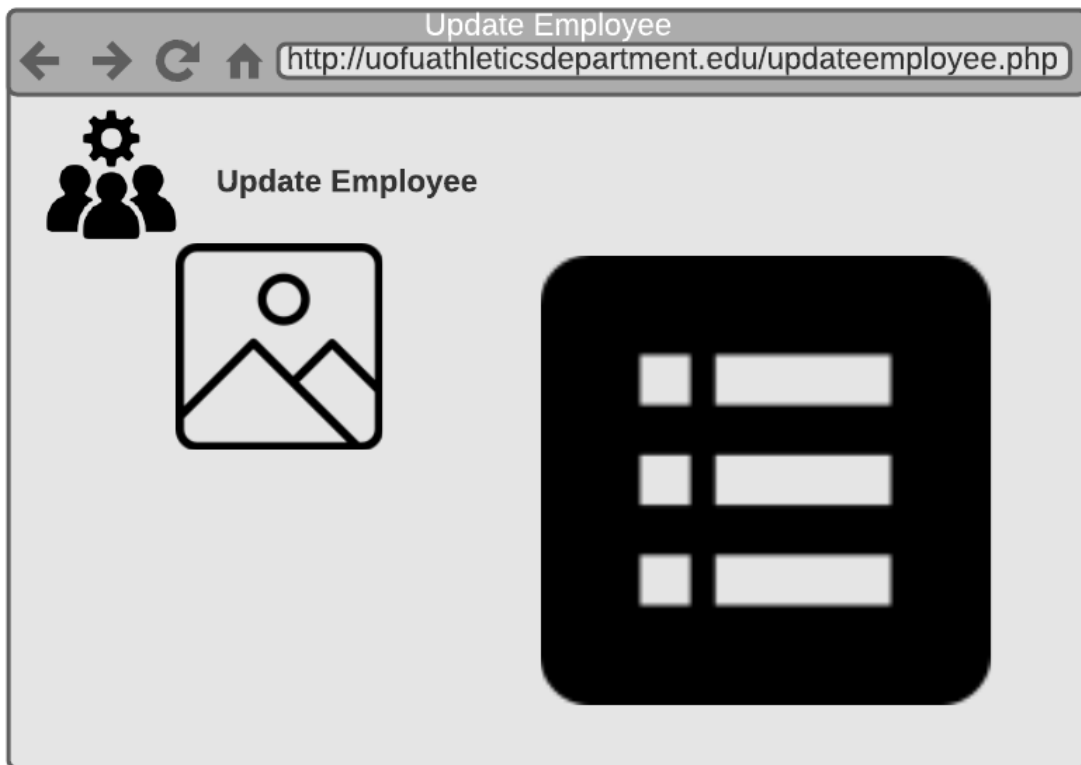

Use Case	Update an Employee	
Objective	Update an Employee in the system	
Business Event	Update an Employee in the system	
Primary Actor (s)	Administrator	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the 'Employee' link in the home page User clicks on the EmployeeID link of the employee to be updated on the employee page.	
Post-condition	User is forwarded to the Employees Page.	
Failure outcomes	User is shown an error message 'Error in updating Employee'.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Employees page (employees.php).	Employees page is shown.
2	User clicks on the EmployeeID of the employee to be updated (update-employee.php).	Update Employee page is shown.
3	User updates Employee details.	
4	User submits the form.	Connect to the database. Update employee details in the Employees table. Forward user to the employees.php page.
5	User sees the employees.php page.	

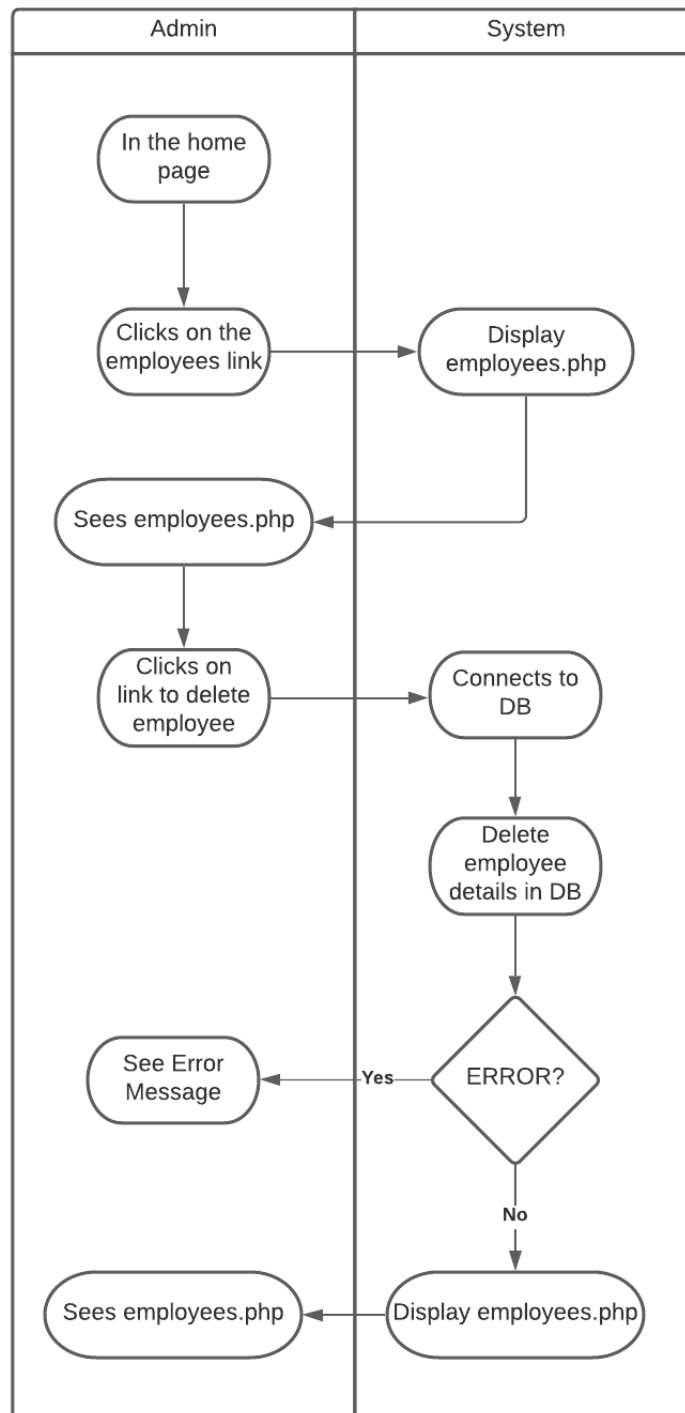

Update Employee

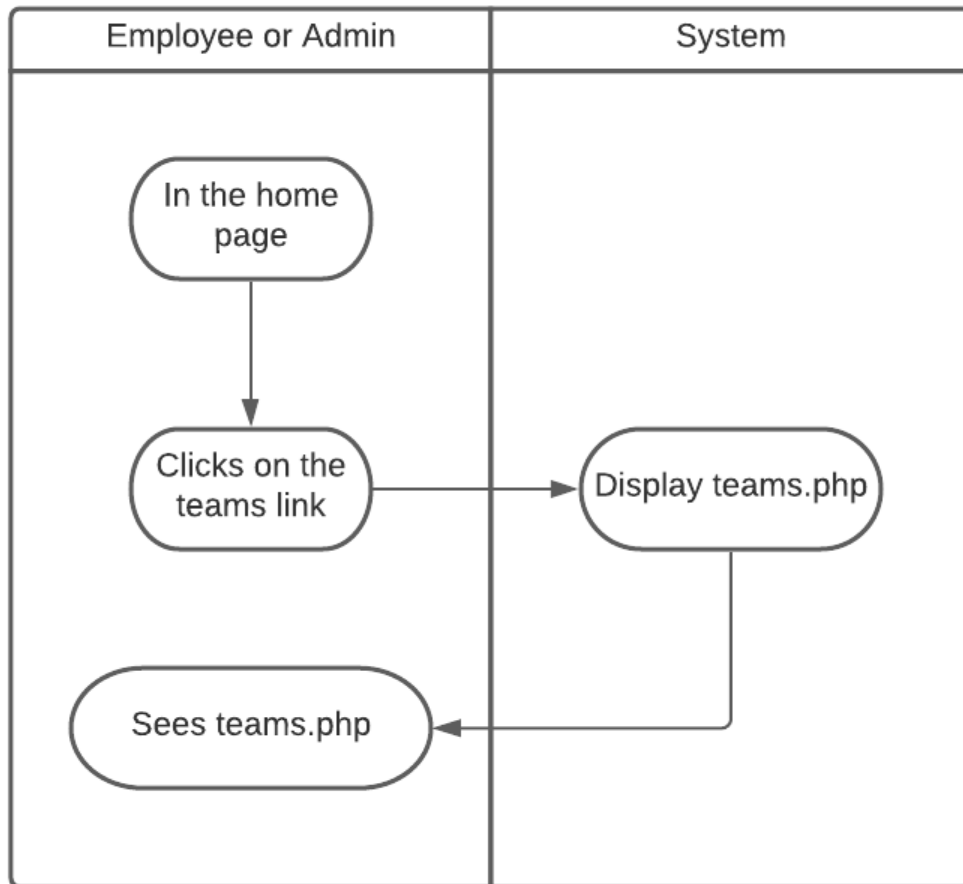

Use Case	Delete an Employee	
Objective	Delete an Employee in the system	
Business Event	Delete an Employee in the system	
Primary Actor (s)	Administrator	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the ‘Employee’ link in the home page User clicks on the “Delete Employee” link in the employees page.	
Post-condition	User is forwarded to the Employee Page.	
Failure outcomes	User is shown an error message ‘Error in deleting Employee’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Employees page (employees.php).	Employees page is shown.
2	User clicks on the Delete Employee (delete-employee.php).	Connect to the database. Delete employee details in the Employees table. Forward user to the employees.php page.
3	User sees the employees.php page.	

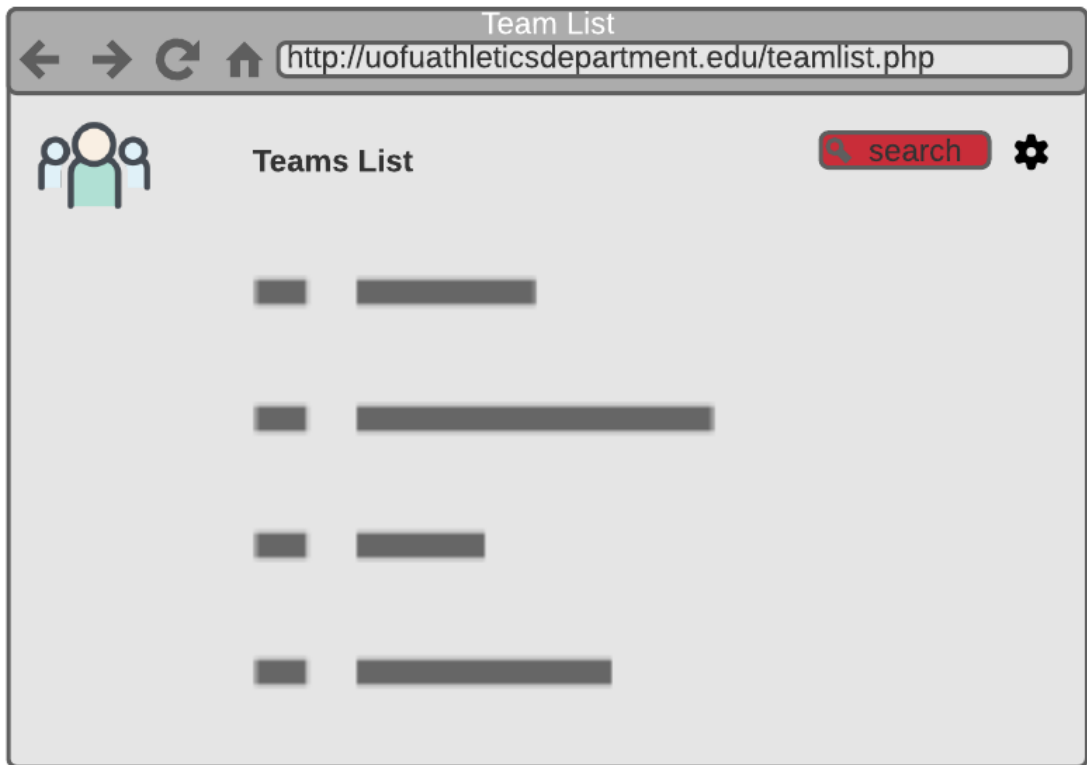

Delete Employee

Use Case	View Teams Page	
Objective	View Teams in the system	
Business Event	View Teams in the system	
Primary Actor (s)	Administrator, Employee	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the 'Teams' link in the home page	
Post-condition	User is forwarded to the Teams page.	
Failure outcomes	User is shown an error message 'Error in viewing Teams page'.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Teams page (teams.php).	Teams page is shown.
2	User sees the teams.php page.	

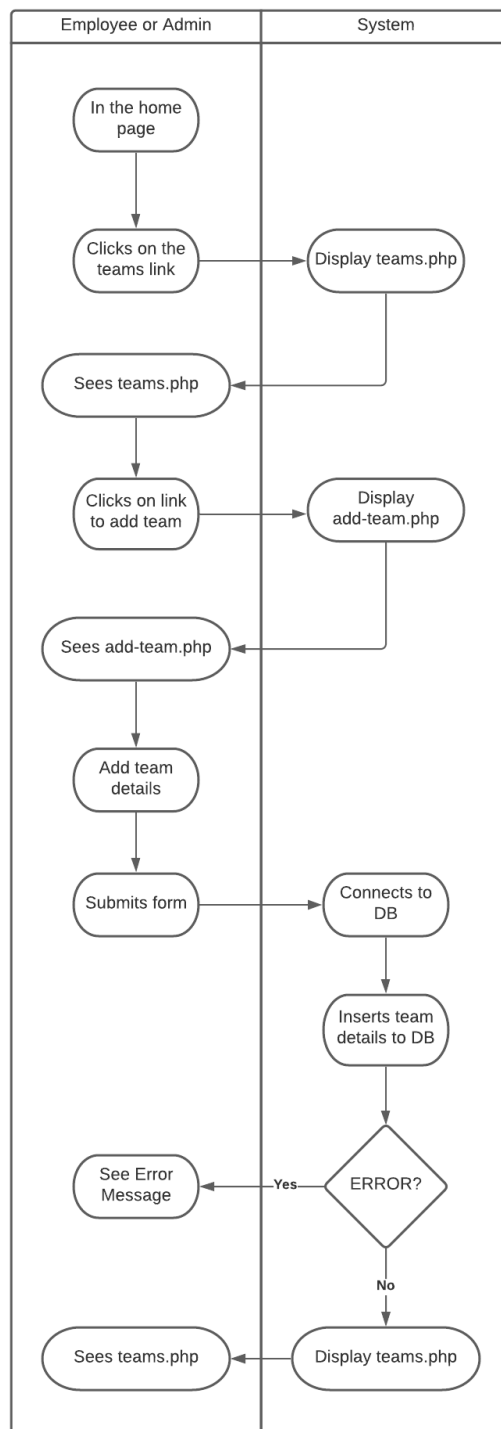

View Teams

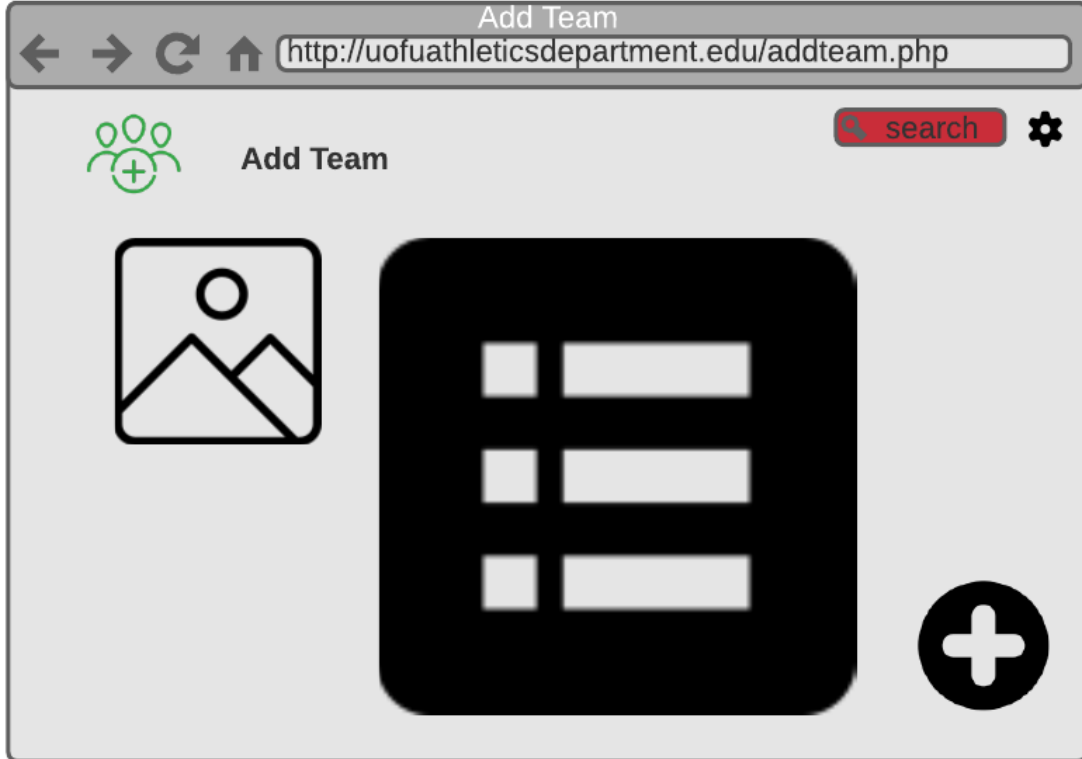

Use Case	Add a new Team	
Objective	Add a new Team into the system	
Business Event	Add a new Team into the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the ‘Teams’ link in the home page User clicks on the ‘Add Team’ link in the teams page.	
Post-condition	User is forwarded to the Teams Page.	
Failure outcomes	User is shown an error message ‘Error in adding a new Team’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Teams page (teams.php).	Teams page is shown.
2	User clicks on the add new Team page (add-team.php).	Add Team page is shown.
3	User adds new Team details.	
4	User submits the form.	Connect to the database. Insert team details into the Teams table. Forward user to the teams.php page.
5	User sees the teams.php page.	

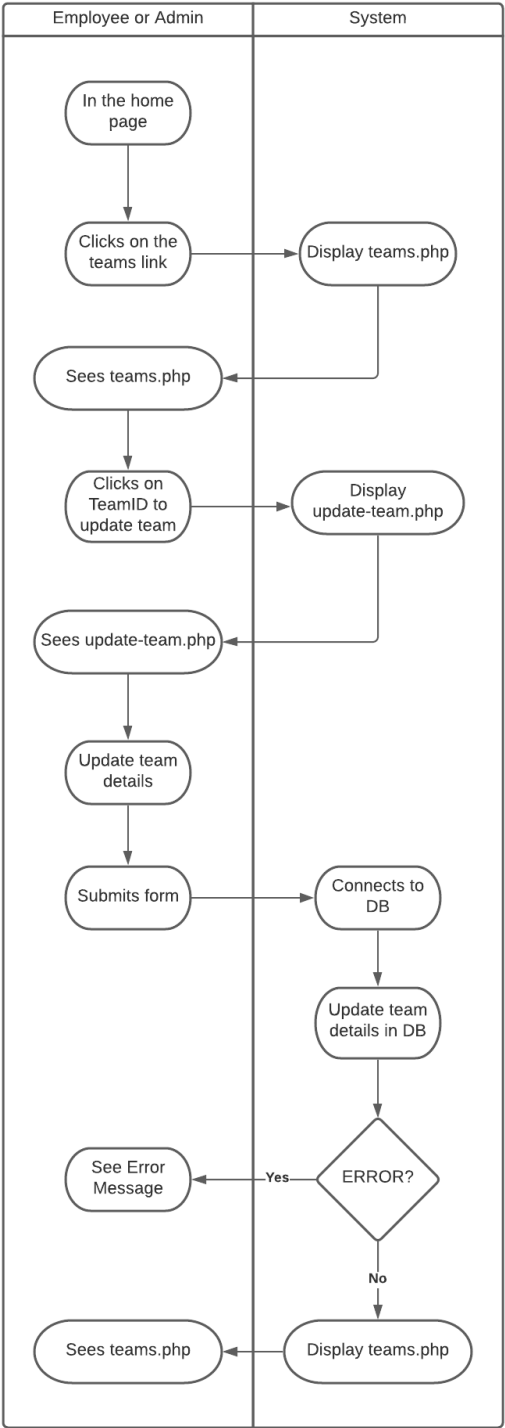

Add Team

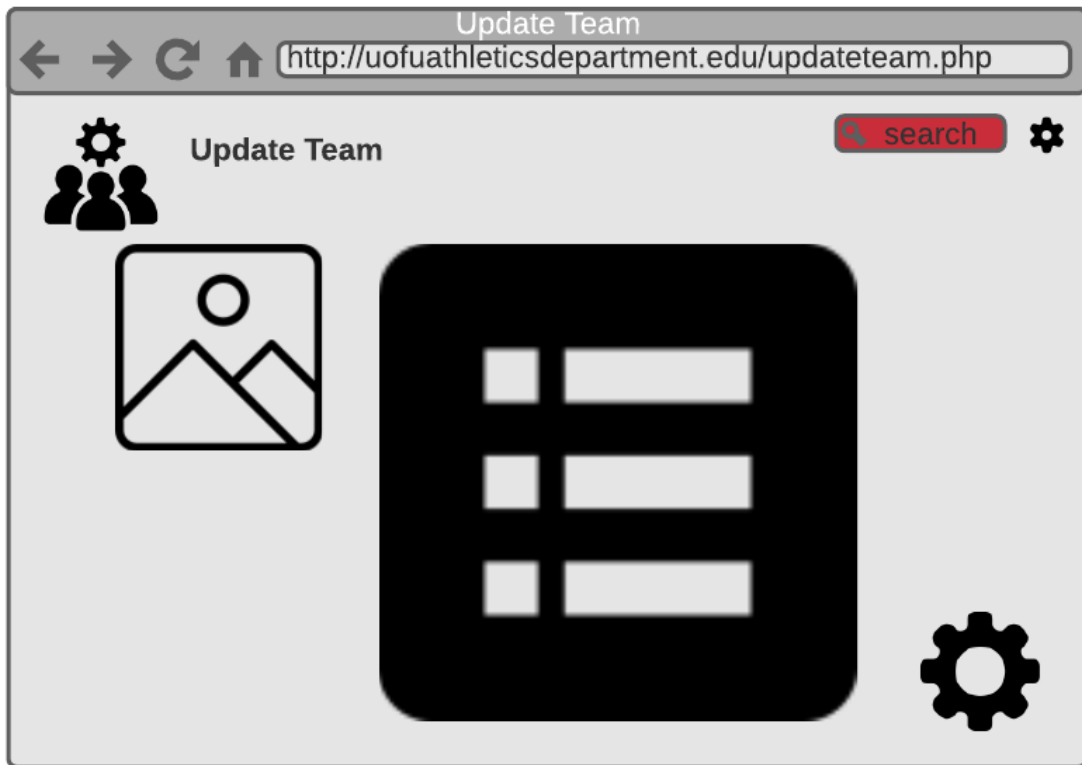

Use Case	Update a Team	
Objective	Update a Team in the system	
Business Event	Update a Team in the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the 'Teams' link in the home page User clicks on the TeamID of the team to be updated in the teams page.	
Post-condition	User is forwarded to the Teams Page.	
Failure outcomes	User is shown an error message 'Error in updating Team'.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Teams page (teams.php).	Teams page is shown.
2	User clicks on the Update Team page (update-team.php).	Update Team page is shown.
3	User updates Team details.	
4	User submits the form.	Connect to the database. Update team details in the Teams table. Forward user to the teams.php page.
5	User sees the teams.php page.	

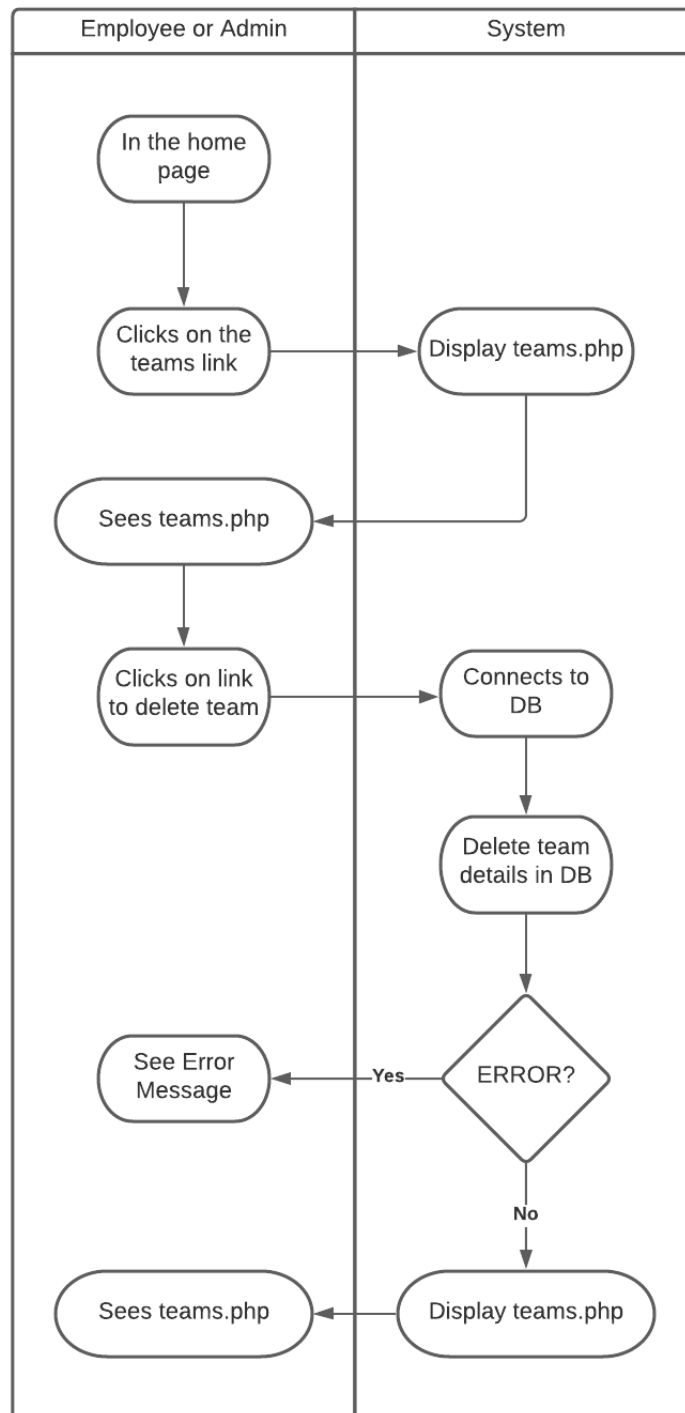

Update Team

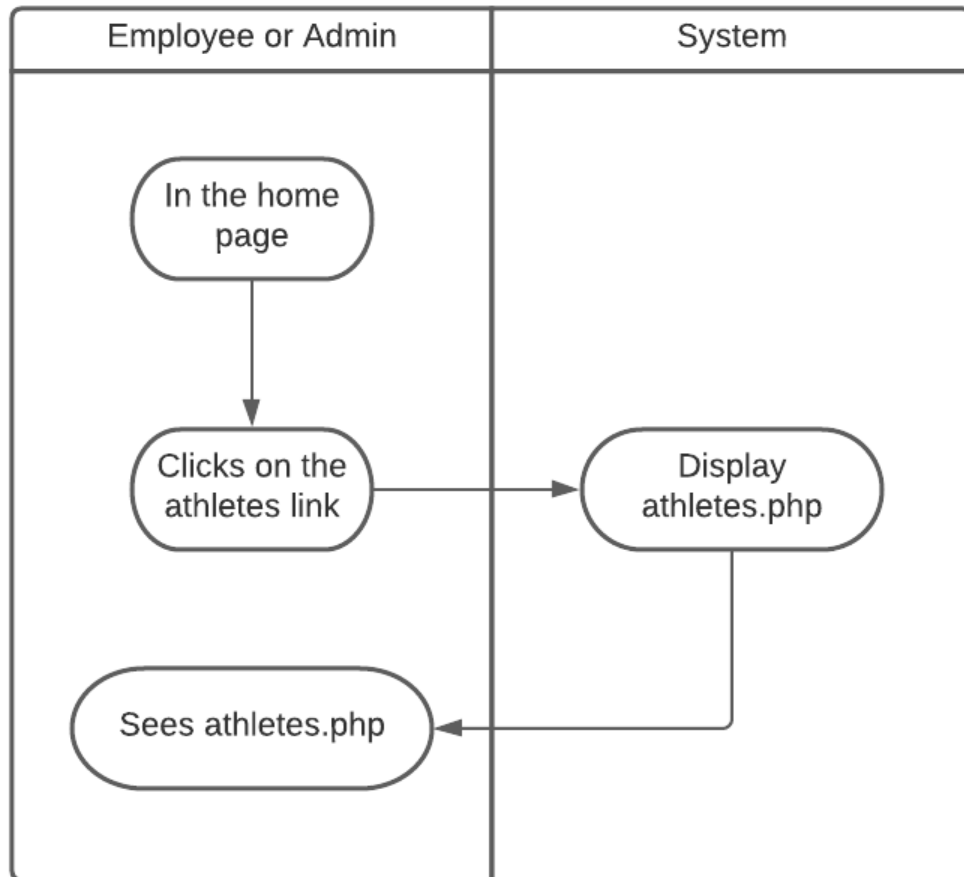

Use Case	Delete a Team	
Objective	Delete a Team in the system	
Business Event	Delete a Team in the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the "Teams" link in the home page User clicks on the "Delete Team" link in the teams page.	
Post-condition	User is forwarded to the Teams Page.	
Failure outcomes	User is shown an error message 'Error in deleting Team'.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Teams page (teams.php).	Teams page is shown.
2	User clicks on the Delete Team link (delete-team.php).	Connect to the database. Delete team details in the Teams table. Forward user to the teams.php page
3	User sees the teams.php page.	

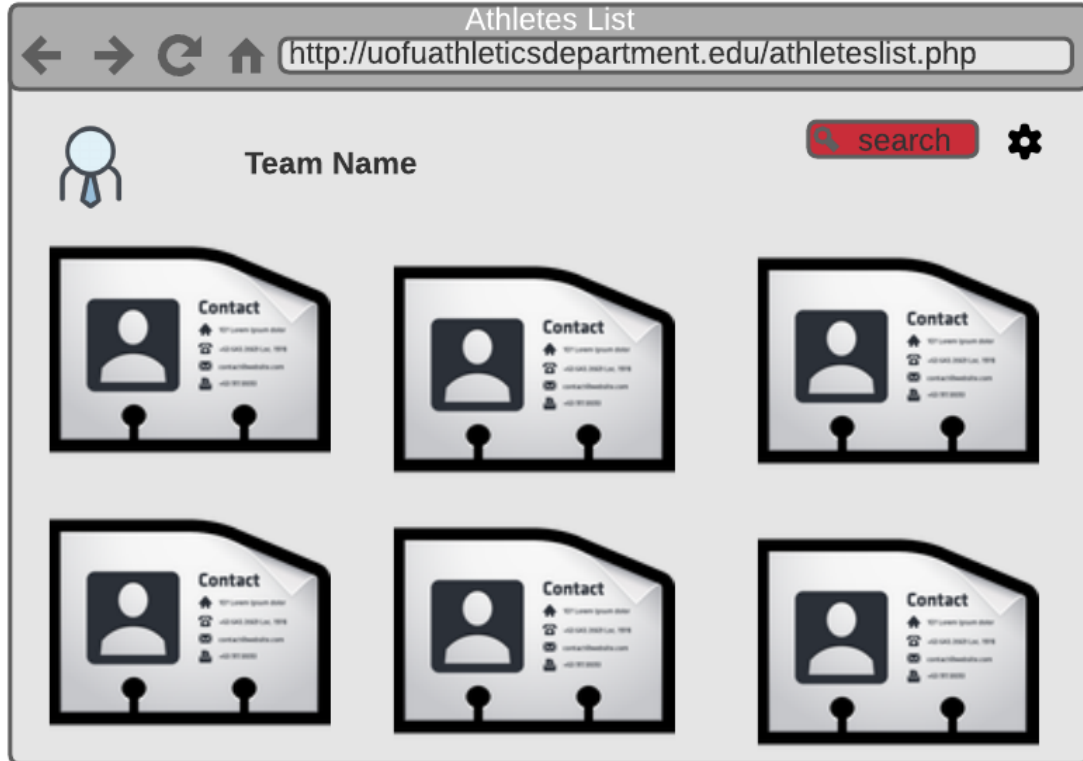

Delete Team

Use Case	View Athletes Page	
Objective	View Athletes in the system	
Business Event	View Athletes in the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the 'Athletes' link in the home page	
Post-condition	User is forwarded to the Athletes page.	
Failure outcomes	User is shown an error message 'Error in viewing Athletes page'.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Athletes page (athletes.php).	Athletes page is shown.
2	User sees the athlete.php page.	

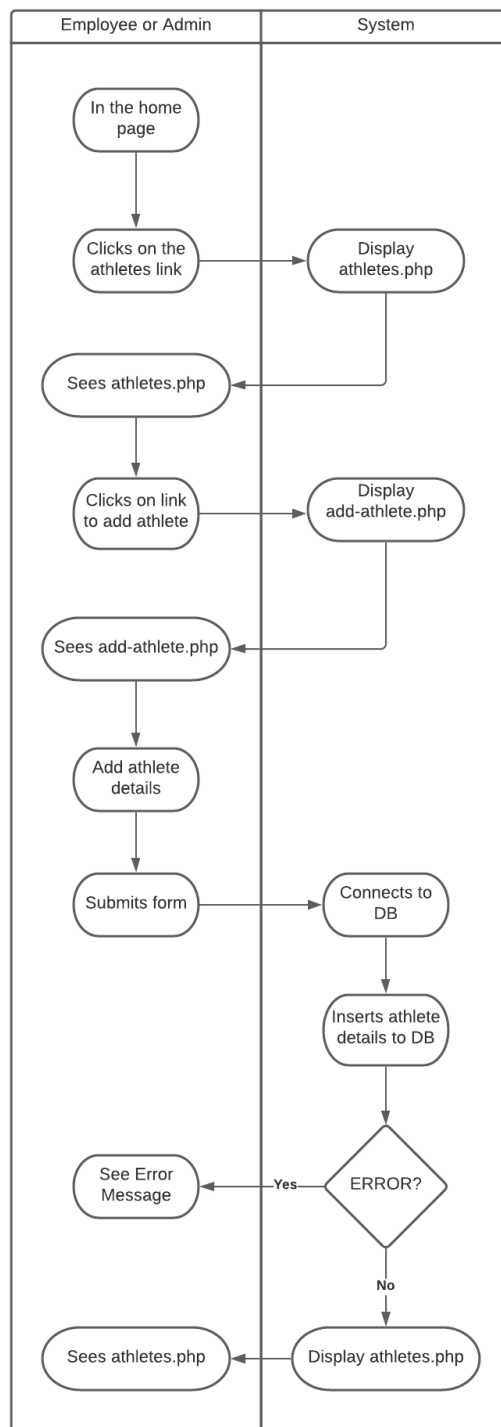

View Athletes

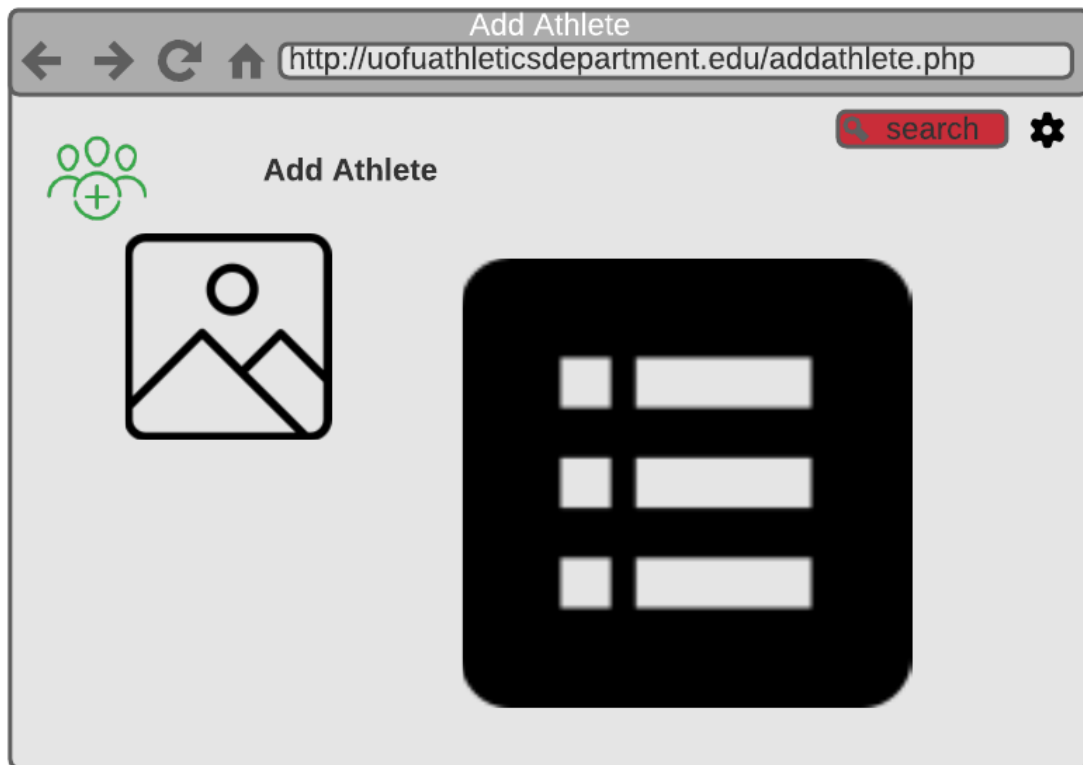

Use Case	Add a new Athlete	
Objective	Add a new Athlete into the system	
Business Event	Add a new Athlete into the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Athletes” link in the home page User clicks on the “Add Athlete” link in the athletes page.	
Post-condition	User is forwarded to the Athlete Page.	
Failure outcomes	User is shown an error message ‘Error in adding a new athlete’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Athletes page (athletes.php).	Athletes page is shown.
2	User clicks on the add new Athlete page (add-athlete.php).	Add Athlete page is shown.
3	User adds new Athlete details.	
4	User submits the form.	Connect to the database. Insert athlete details into the Athletes table. Forward user to the athletes.php page.
5	User sees the athletes.php page.	

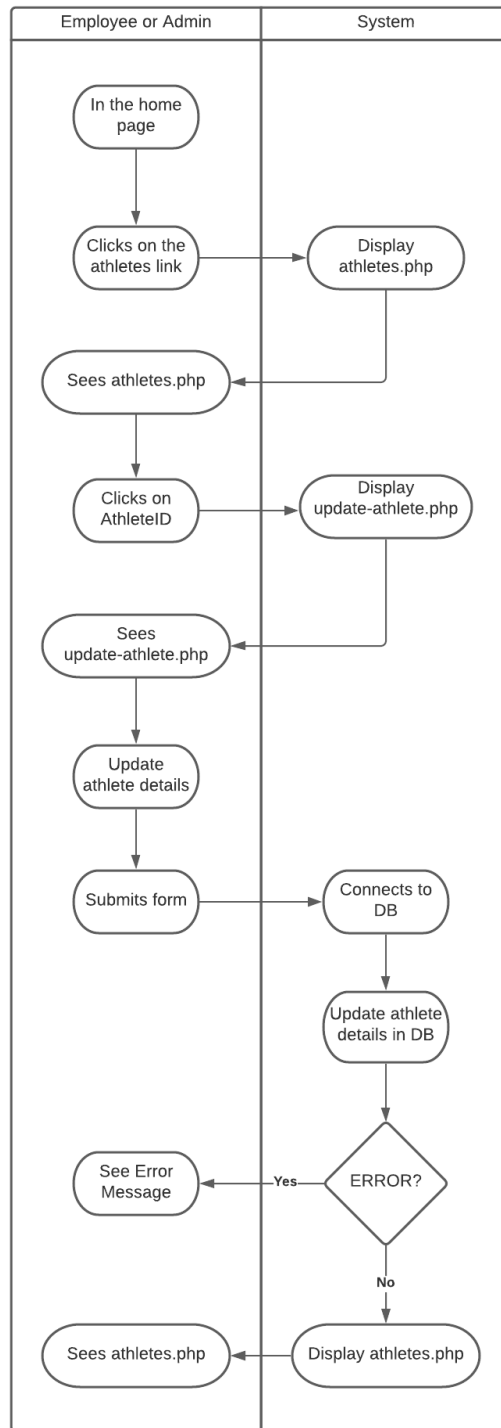

Add Athlete

Use Case	Update an Athlete	
Objective	Update an Athlete in the system	
Business Event	Update an Athlete in the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Athletes” link in the home page User clicks on the AthleteID of the athlete to be updated in the athletes page.	
Post-condition	User is forwarded to the Athletes Page.	
Failure outcomes	User is shown an error message ‘Error in updating athlete’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Athletes page (athletes.php).	Athletes page is shown.
2	User clicks on the AthleteID (update-athlete.php).	Update Athlete page is shown.
3	User updates Athlete details.	
4	User submits the form.	Connect to the database. Update athlete details in the Athletes table. Forward user to the athletes.php page.
5	User sees the athletes.php page.	

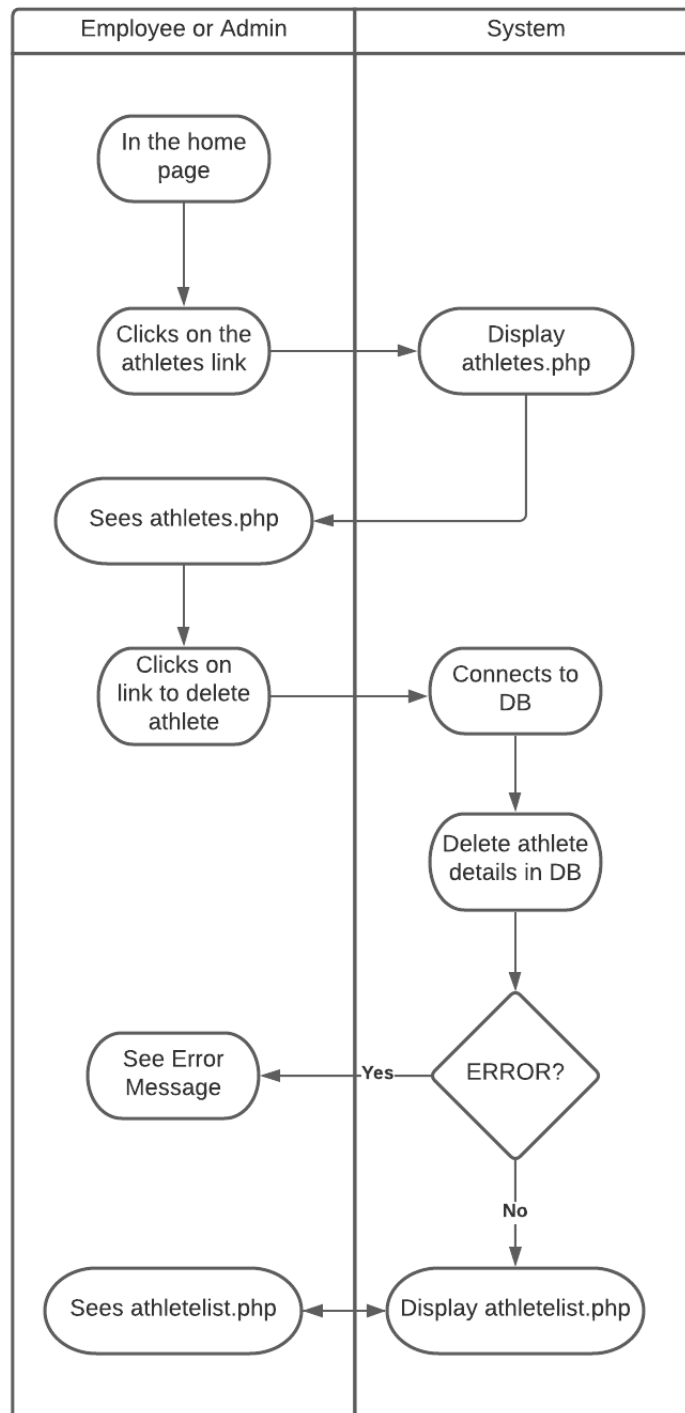

Update Athlete

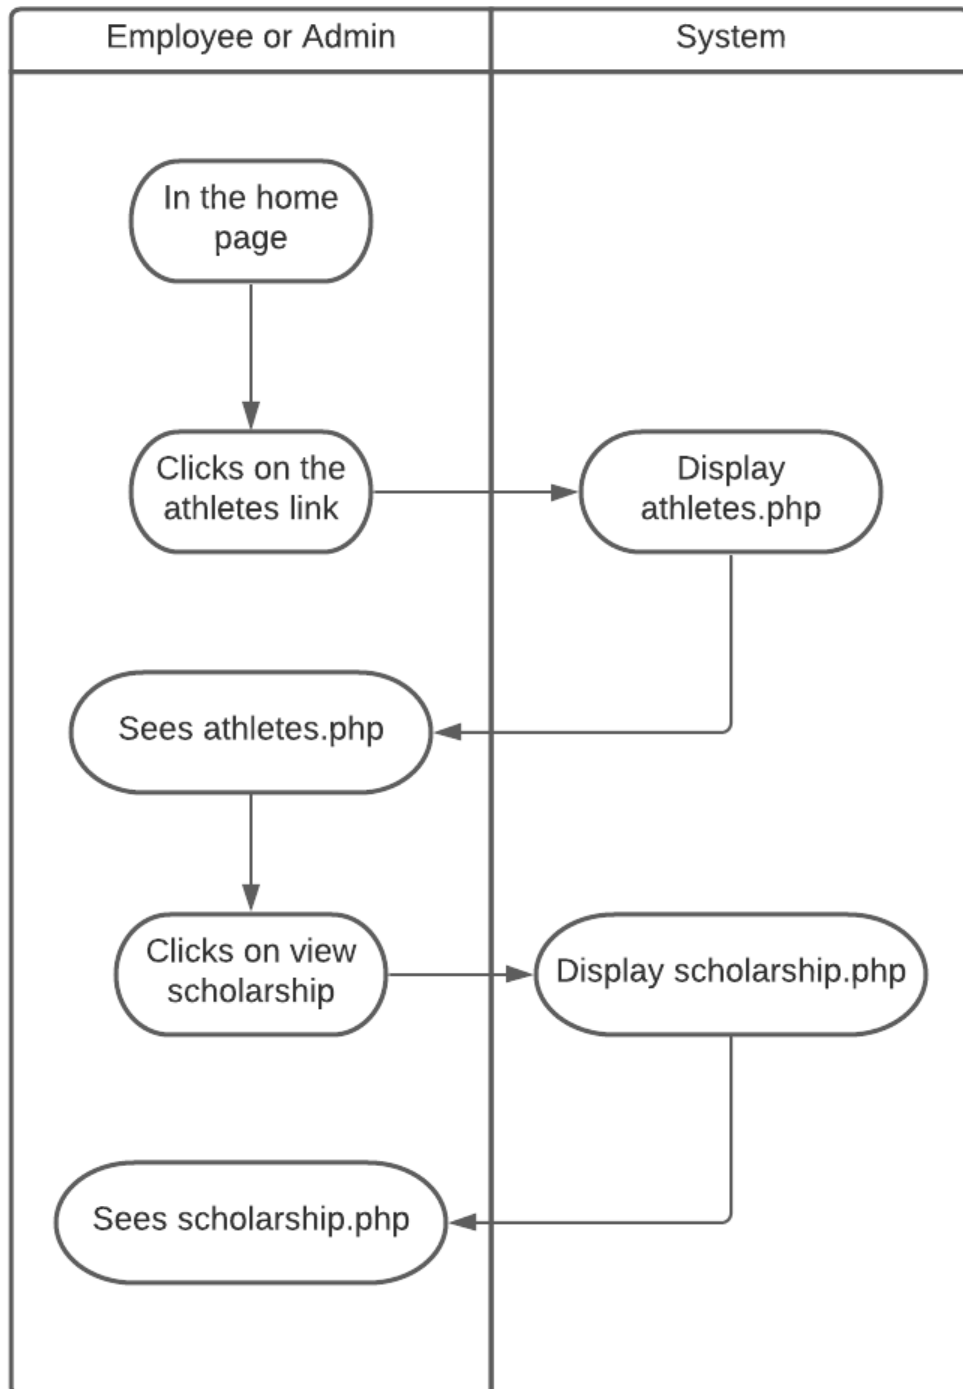

Use Case	Delete an Athlete	
Objective	Delete an Athlete in the system	
Business Event	Delete an Athlete in the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Athletes” link in the home page User clicks on the “Delete Athlete” link in the athletes page.	
Post-condition	User is forwarded to the Athlete Page.	
Failure outcomes	User is shown an error message ‘Error in deleting athlete’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Athletes page (athletes.php).	Athletes page is shown.
2	User clicks on the Delete Athlete page (delete-athlete.php).	Connect to the database. Delete athlete details in the Athletes table. Forward user to the athletes.php page.
3	User sees the athletes.php page.	

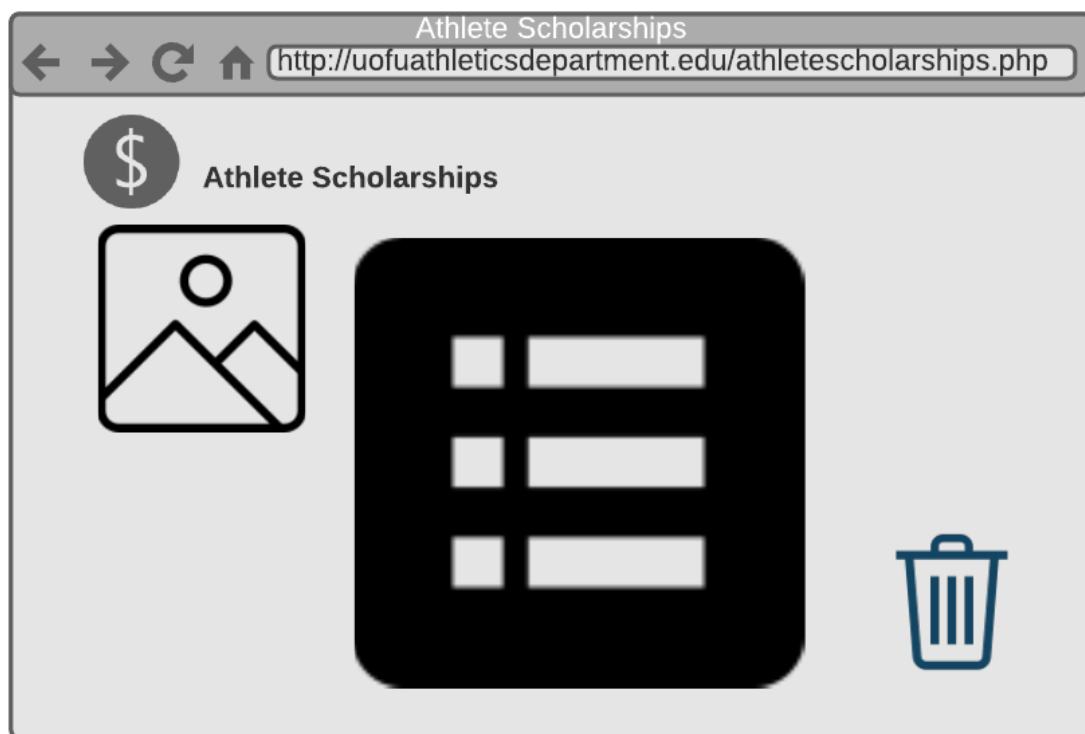

Delete Athlete

Use Case	View Athlete Scholarships	
Objective	View Athlete Scholarships.	
Business Event	View Athlete Scholarships.	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Athletes” link in the home page User clicks on the “View Scholarships” link in the Athletes page.	
Post-condition	User is forwarded to the View Scholarships link in the Athletes page.	
Failure outcomes	User is shown an error message ‘Error in viewing Scholarship’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Athletes page (athletes.php).	Athletes page is shown.
2	User clicks on the “View Scholarship” link	View Scholarship is shown.
3	User sees the View Scholarship page.	

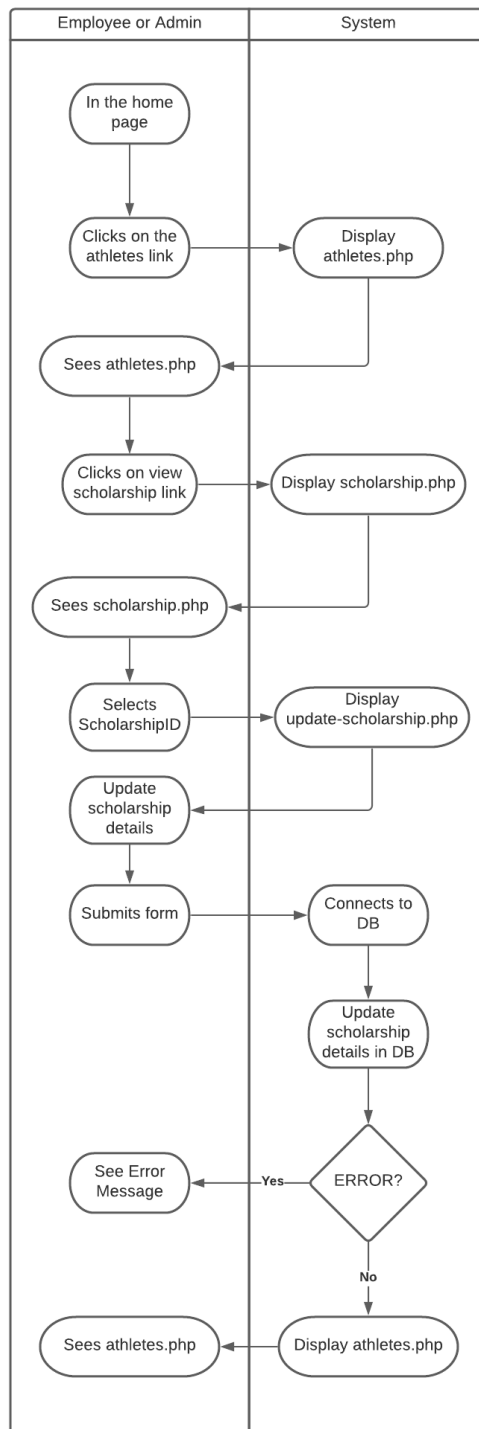

View Athlete Scholarships

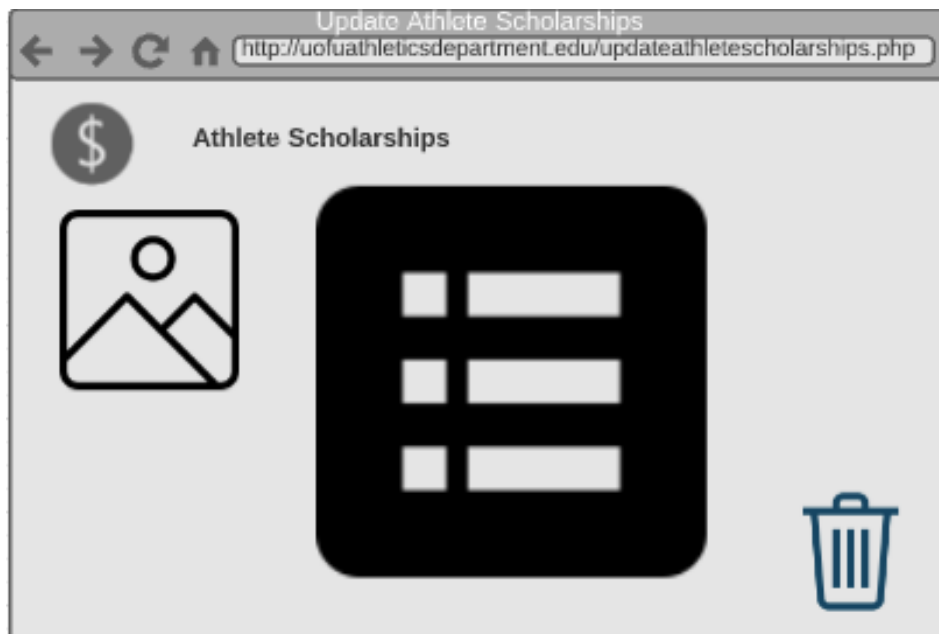

Use Case	Update Athlete Scholarships	
Objective	Update Athlete Scholarships.	
Business Event	Update Athlete Scholarships.	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Athletes” link in the home page User clicks on the “View Scholarship” link in the Athletes page. User selects ScholarshipID for scholarship to be updated.	
Post-condition	User is forwarded to the Athletes page.	
Failure outcomes	User is shown an error message ‘Error in updating Scholarship’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Athletes page (athletes.php).	Athletes page is shown.
2	User clicks on the “View Scholarship” link	scholarships.php page is shown.
3	User clicks on the ScholarshipID for the scholarship to be updated	update-scholarship.php is shown
3	User updates Scholarship information	Connect to the database. Update scholarship details in the Scholarships table. Forward user to the athlete.php page.
4	User sees the athlete.php page.	

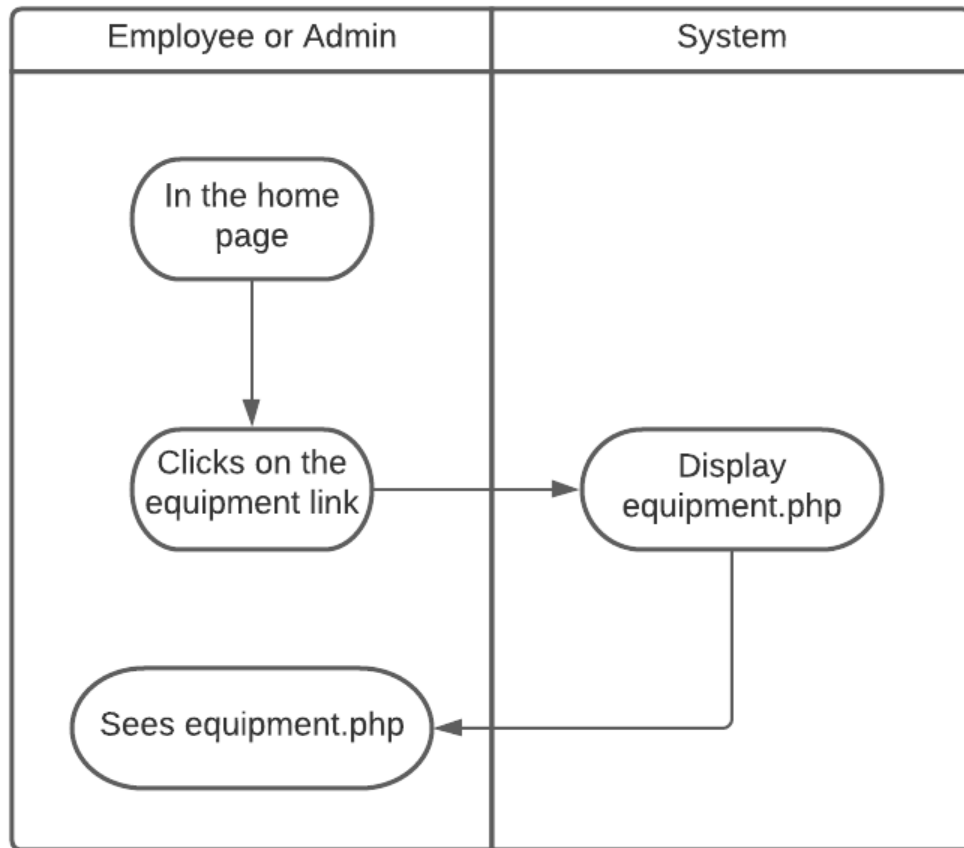

Update Athlete Scholarships

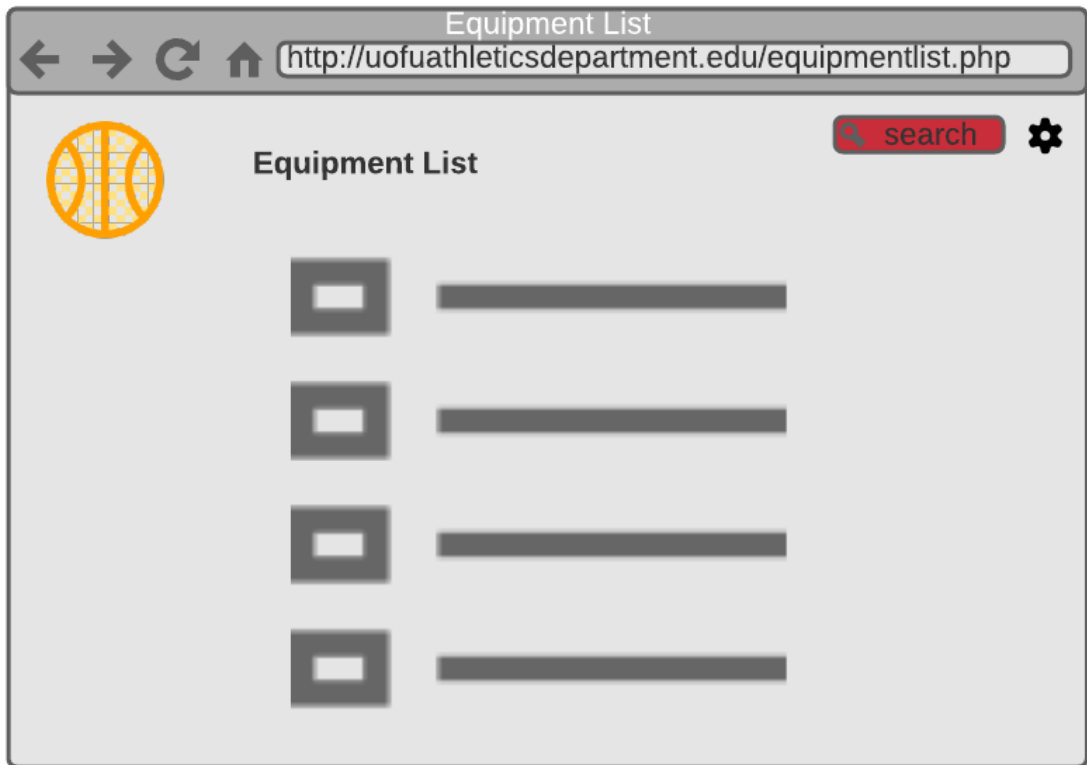

Use Case	View Equipment Page	
Objective	View Equipment in the system	
Business Event	View Equipment in the system	
Primary Actor (s)	Employee or Admin	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the 'Equipment' link in the home page	
Post-condition	User is forwarded to the Equipment page.	
Failure outcomes	User is shown an error message 'Error in viewing Equipment page'.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Equipment page (equipment.php).	Equipment page is shown.
2	User sees the equipment.php page.	

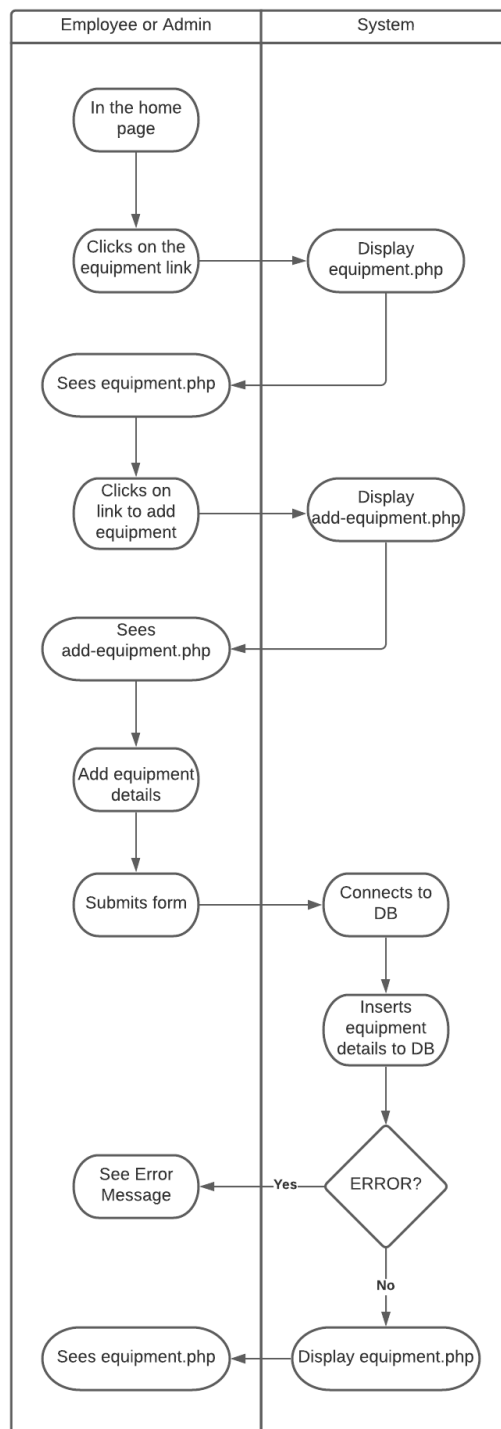

View Equipment

Use Case	Add Equipment	
Objective	Add Equipment into the system	
Business Event	Add Equipment into the system	
Primary Actor (s)	Employee	
Secondary Actor (s)	None.	
Pre-condition	User must be logged into the system. User clicks on the “Equipment” link in the home page User clicks on the “Add Equipment” link in the equipment page.	
Post-condition	User is forwarded to the Equipment Page.	
Failure outcomes	User is shown an error message ‘Error in adding equipment’.	
Flow of Events	Actor	System
1	User in the home page (home.php). User clicks on the Equipment page (equipment.php).	Equipment page is shown.
2	User clicks on the Add Equipment page (add-equipment.php).	Add Equipment page is shown.
3	User adds new Equipment details.	
4	User submits the form.	Connect to the database. Insert equipment details into the Equipment table. Forward user to the equipment.php page.
5	User sees the equipment.php page.
